

Professional Year Program - Engineering

Securing your first job after graduation can be daunting. Australian companies receive an average of 200 CVs for every advertised vacancy*. Just getting an interview can be challenging when employers require demonstration of previous work experience.

Navitas Professional will prepare you for the Australian workplace by applying your theoretical knowledge to practice and build your employability skills specific to engineering. Using educational technology tools, our program integrates courses such as practical training in AutoCAD, motion graphics and Revit to ensure you're ready for the contemporary work environment.

Navitas Professional is the only national provider that delivers the Skilled Migration Internship Program - Accounting and the Professional Year Program in ICT and Engineering in all states and the Northern Territory.

Entry requirements: Visit navitas-internships.com/py/eea

"The Professional Year coursework is definitely a great bridge to employment. I particularly enjoyed the job application workshop on interview preparation. I successfully applied these techniques and was offered an internship opportunity with Coca Cola Amatil."

Sophia, Engineering Internship Coca Cola Amatil

The Navitas Professional Year Program difference

English test preparation	Access free PTE-A, IELTS or BULATS online English test preparation.
Flexibility	Rolling intakes†; so you don't have to wait to start your work-readiness training.
